

Eco-Schools Primary Environmental Review

This review is a suggested format, designed to be an audit tool for the Eco-Committee to use in your school. The questions are labelled so that you can tell which will require investigation by the pupils, which they will need to ask a member of staff about and which may take a bit of research.

The Eco-Schools programme does not require that you complete all the suggestions in this document. It is designed to be a stimulus that you can use to assess what happens in your school at the start of the programme and as a baseline audit each year.

You may not know all the answers to all the questions in each section but if you choose to work further on a topic the answers should be found by the next time you complete the review. It also might not include every possible idea that you could carry out, so please don't take the questions as exhaustive.

The questions will help Eco-Committee members to think of actions that can be undertaken in the school to improve the environment and the school's impact on our planet. The 3 chosen topics (1 major and 2 minor) for the year should then be put into an Action Plan.

Take the time to investigate every year as a lot can change over 12 months.

Key

	These are suggested links to the UN Sustainable Development Goals (SDGs). For more ideas and information visit our website .
	Pupils can find the answers themselves by looking carefully around the school.
	Pupils may need to ask an adult to find the answers to these questions.
	A little bit more investigation is required, maybe a survey or asking questions to other pupils.
	This is a way of measuring the impact that you are having on the environment so you can show how much you are improving. This is an important part of being an Eco-School.
