Bunscoil Bheanna Boirche ICT Vision

‘Mol an óige’

ICT allows all pupils to gain confidence and ability in an ever-changing society and prepares them for the challenge of a rapidly developing and evolving technological world. Here at Bunscoil Bheanna Boirche, we consider it our vision -

- To provide opportunities to enable all our staff, pupils and parents to be confident, competent and independent users of ICT.
- To provide an environment where access to ICT resources is natural and commonplace.
- To ensure ICT has a fundamental role in developing and enhancing our school's key learning aims in promoting the pupils' educational, physical and social needs.
- To allow staff and children to gain confidence in and enjoyment from, the use of ICT.
- To allow staff to develop professionally by enhancing their teaching, management and administrative skills.
- To allow children to achieve specific ICT skills as set down in the Curriculum via the UICT Cross-Curricular Skills
- To provide pupils with opportunities to Explore, Express, Exchange, Evaluate and Exhibit through ICT.

- To provide these ICT learning experiences through the medium of Irish.

Introduction

ICT has the power to change the lives of everyone. ICT is a generic term used to denote the convergence of computers, video and telecommunications, as seen in the use of multi-media computers, mobile phones, tablets devices, gaming consoles etc.

We aim to enable our pupils to find, explore, analyse, exchange and present information. We also focus on developing the skills necessary for children to be able to use information in a discriminating and effective way.

Bunscoil Bheanna Boirche meets the requirements set out within the Northern Ireland Curriculum and develops the use of the 5Es within the tasks already being carried out.

- Explore
- Express
- Exchange
- Evaluate
- Exhibit

Bunscoil Bheanna Boirche is equipped with a wide range of ICT resources.

Every class has access to:

- at least 1 class PC
- a selection of additional laptops
- a colour printer and scanner
- an Interactive Whiteboard
- programmable devices, ie Spheros, Beebots and/or Probots
- voice recording equipment (Easispeaks, mp3 recorders, headphones with microphones)
- Chromebooks
- a school set of iPad minis & iPad Airs
- an Apple TV device
- 3 dongle devices

Strategies for use of ICT

- ICT is not taught as a distinct subject, but it is a tool to be used as appropriate throughout the curriculum
- All pupils are given equal access to ICT, and not just as a reward for fast finishers
- ICT is an entitlement for all pupils
- Common tasks are set that are open-ended and can have a variety of responses
- We provide suitable learning opportunities for all children by matching the challenge of the task to the ability and experience of the child
- Use of ICT at home is encouraged through projects, homeworks and the use of MySchool, News Desk and Google Classroom which can be accessed through a home computer system or at the local library
- Pupils are provided with online literacy and numeracy accounts to enable them to continue their learning at home via ICT
- Pupils and their families are encouraged to access and make use of the school website and app.

ICT Competences

At Bunscoil Bheanna Boirche we endeavour to help our pupils to develop competence in the use of ICT.

ICT competence is concerned with:

- Learning about ICT – developing the knowledge and skills required to use ICT effectively and to apply these skills in a range of contexts.
- Learning through ICT – developing the skills required to access and use information from a range of electronic sources, interpret it and use it effectively.
- Learning with ICT – applying the skills in their own learning either at school, at home or in the community.

As outlined in the NI Curriculum, there are 8 desirable features/skills pupils are expected to become competent in:

- Desktop Publishing
- Film and Animation
- Interactive Design
- Managing Data
- Music and Sound
- Online Communication
- Presenting
- Working with Images

Pupils accessing the Internet

For all information related to this see Bunscoil Bheanna Boirche's **eSafety Policy** (see attached annex). Pupils annually participate in 'Safer Internet Day' in Term 2, and teachers actively promote safety and well-being whilst online in each class.

ICT and the Northern Ireland Curriculum

- Literacy

ICT is a major contributor to the teaching of Literacy

- Children learn how to draft, edit and revise text.
- Children can create, develop, present and publish ideas and opinions visually or orally.
- They learn how to improve the presentation of their work.

- Numeracy

- Many ICT activities build upon the mathematical skills of the children.
- ○ Children use ICT in Numeracy to collect data, make predictions, analyse results, and present information graphically.
- ○ They can explore coding and shape and space using programmable devices e.g. use of BeeBots, Probots Spheros and spreadsheets.
- ○ Children can participate in online maths games and challenges to help their mental maths and maths reasoning/oracy skills

- Personal Development and Mutual Understanding (PDMU) and Citizenship

ICT makes a contribution to the teaching of PDMU and citizenship as children learn to work together in a collaborative manner.

- They develop a sense of global citizenship by using the Internet.

- Through the discussion of moral issues related to electronic communication, children develop a view about the use and misuse of ICT as exemplified through the use of MySchool and Google Classroom.
- They also gain a knowledge and understanding of the interdependence of people around the world.
- They understand the way to be safe when using ICT (when online and when using digital media, such as cameras, mobile telephones etc...)

- Creative and Expressive

ICT offers children the freedom to express their own ideas creatively and to experience the designs of others.

- Children will have the opportunity to develop their creativity through a range of network software and digital technology.
- They can explore the Internet to gain access to a wealth of images and information about world famous artwork, creations and music.

- The World Around Us

ICT transcends the barriers of distance and opens up the world as an easily accessible global community allowing children to experience the past, present and future of the world they live in.

- Children will be encouraged and guided how to explore the Internet to gain access to a wealth of images and information about people, places and things around the world in the past, in the present and gaining ideas for the future, and present their work using a variety of hardware and software, namely either on a computer or an iPad, through a selection of programs (Word, Powerpoint, Adobe Spark, iMovie etc...).

Inclusion

Bunscoil Bheanna Boirche's ICT facilities are available for use by all pupils and staff. All children are given access to ICT regardless of gender, race, ability, physical or sensory disability. ICT can impact on the quality of work that children can produce and it can increase their confidence and motivation.

As stated in our school vision, it is one of our aims to provide opportunities to enable all our staff, pupils **and parents** to be confident, competent and independent users of ICT.

We have provided and endeavor to continue to provide opportunities for parents and members of the wider community to develop their ICT skills, through classes and workshops on how to use iPads and tablet devices, to online safety awareness sessions.

Progression, Monitoring, Assessing and Evaluating

Progression

- All children develop and learn at their own pace.
- Progression is assured through a range of increasingly challenging activities covering all areas of ICT and embedded holistically in the Northern Ireland Curriculum.
- From Foundation Stage, through Key Stages 1 and 2, 3 – 6 tasks are assigned appropriately every year, according to ability and topic work in class, and are developed within each year group from the CCEA Using ICT Task List.
- We have developed our own Lines of Progression document to help teachers ensure all pupils are covering all 5E's every year.

Monitoring

- Evidence of pupils' work/tasks covering all areas of ICT are gathered by the class teacher and saved in the class folder on Google Drive.
- Teachers put samples of work at each level into the class folder on Google Drive termly to be discussed at coordinator meetings.
- Coordinator monitors pupils' progression and the range of tasks being completed in each class / year group to ensure continuity and to prevent overlap/repetition/gaps in provision.

Assessing

- Evidence gathered each year is assessed by the ICT coordinator and each class teacher.
- Levels of Progression are assigned to each piece of work by class teacher, overseen by ICT coordinator

Evaluating

- Pupils progress will be evaluated by staff in partnership with ICT coordinator termly
- Pupils will engage in self-evaluation of their own work, as well as participate in peer-evaluation activities, as modeled by the class teacher
- Evidence gathered each year will be summarized within a self-evaluative report, as outlined in Action plan.

ICT Co-ordinator

- It is the responsibility of the ICT coordinator to assist teachers with the implementation of this policy.
- The ICT coordinator has the responsibility for the management and dissemination of resources, which are required for the implementation of this policy.

- THE ICT CO-ORDINATOR IS NOT A TECHNICIAN, AND IS NOT RESPONSIBLE FOR UPKEEP/MAINTENANCE OF HARDWARE. The ICT can advise and signpost staff to the relevant agency (Capita/C2K etc...) when help is needed.
- The ICT coordinator will disseminate information regarding new developments in ICT to other members of staff.
- The ICT coordinator will be responsible for the updating of policy, action plans and Internet guidelines and informing staff of aforementioned documents.

Annex 1

Bunscoil Bheanna Boirche **ICT and Health and Safety Policy**

General Guidance

- Eyestrain – avoid long periods on the computer (20-25mins maximum).
- Advise children to take short breaks during a task.
- Give yourself room – avoid a cluttered work area. Spread out keyboard, mouse and printer etc.
- Computer/keyboard/equipment should be at an appropriate height/distance for pupils to access/use comfortably and safely – they shouldn't have to reach or stretch to use any ICT equipment/devices
- Make sure that the top of the monitor is at eye level. The screen should be between 50-70 cms from the user.
- Food and drink should not be consumed near ICT equipment.
- An adult should always supervise children when they are accessing information via the Internet.
- The service provider does filter information but staff are ultimately responsible for information accessed by pupils.

Sitting

- Appropriate seating should be allocated for use with the school computers that gives proper back support
- Screen positioned to avoid glare
- Feet flat on the floor, shoulders and neck relaxed, forearms level with desk

Covid 19

- In light of Covid 19 restrictions, a small set of iPads has been designated to each classroom, rather than being timetabled to be shared among year groups. This does cause limitations, and teachers will have to ensure activities are planned adequately so that all children receive fair access to the equipment.

Annex 2

Bunscoil Bheanna Boirche eSafety Policy

Management of internet

Under the supervision of C2K (the Education Authority's I.T provider) Bunscoil Bheanna Boirche is given access to the internet. C2k monitor web sites and block unwanted SPAM providing a safe environment for school children to surf the web.

Maintaining the security of the school ICT network

The school's network is managed by an outside body which has been approved and licensed by the Education Authority

We are aware that connection to the internet significantly increases the risk that a computer or a computer network may be infected by a virus or accessed by unauthorised persons.

C2K has installed and monitors a state of the art protection system that ensures access is only granted to its users.

Advantages of Internet Access to Learning and Teaching

Providing children with access to the internet in school will:

- raise educational standards and support the professional work of staff
- give access to websites world-wide (including museums and art galleries) offering educational resources, news and current events
- improve the communication of both staff and pupils with other schools

In addition, staff will have the opportunity to:

- access educational materials and good curriculum practice
- communicate with the advisory and support services, professional associations and colleagues
- exchange curriculum and administration data with the education boards and colleagues
- receive up-to-date information
- participate in government and school initiatives.

The internet is also used to:

- enhance the school's management information and business administration systems which follow data protection regulations.

Professional development for teachers

Staff are given opportunities to discuss ICT issues and develop good teaching strategies at regular intervals. All staff (including teachers, supply staff and classroom assistants) and any other adults involved in supervising children accessing the internet, are able to access the school ICT and eSafety Policy from our school website.

Parental awareness

Parents' attention is drawn to the Policy in writing in the first instance and, thereafter, our school ICT and eSafety Policy is available for parents and others to access online from the school website, or to view on appointment with the school office.

Risk Assessment- Ensuring internet access is appropriate and safe

It is not possible to guarantee that particular types of material will never appear on a computer screen.

Neither the school nor C2K can accept liability for the material accessed, or any consequences thereof.

The following key measures have been adopted to help ensure that our pupils are not exposed to unsuitable material:

- our internet access is monitored by C2K which provides a service designed for pupils including a "firewall" filtering system intended to prevent access to material inappropriate for children;
- children using the internet will normally be working in the classroom, during lesson time and will be supervised by an adult (usually the class teacher) at all times;
- staff will check that the sites pre-selected for pupil use are appropriate to the age and maturity of pupils;
- staff will be particularly vigilant when pupils are undertaking their own research and will check that the children are following the agreed Golden Rules;
- pupils will be taught to use the internet responsibly in order to reduce the risk to themselves and others;
- Golden Rules for Responsible Internet Use will be posted near computer systems.
- the IT co-ordinator will ensure that occasional checks are made on files to monitor compliance with the school's Internet Access Policy;
- the principal will ensure that the policy is implemented effectively;

Inadvertent or Deliberate exposure to unsuitable material

It is the experience of other schools that the above measures have been highly effective. However, due to the international scale and linked nature of information available via the internet, it is not possible to guarantee that particular types of material will never appear on a computer screen.

A most important element of our Golden Rules of Responsible Internet Use is that pupils will be taught to tell a teacher **immediately** if they encounter any material that makes them feel uncomfortable.

If there is an incident in which a pupil is exposed to offensive or upsetting material the school will wish to respond to the situation quickly and on a number of levels. Responsibility for handling incidents involving children will be taken by the IT Co-ordinator and the Child Protection Officer in consultation with the Principal and the pupil's class teacher.

- If one or more pupils discover (view) inappropriate material our first priority will be to give them appropriate support. The pupil's parents/carers will be informed and given an explanation of the course of action the school has taken. The school aims to work with parents/carers and pupils to resolve any issue;
- If staff or pupils discover unsuitable sites the IT co-ordinator will be informed. The IT co-ordinator will report the URL (address) and content to C2K; if it is thought that the material is illegal, the site will be referred to the police.

Pupil awareness and responsibilities

A most important element of our **Golden Rules of Responsible Internet Use** is that pupils will be taught to tell a teacher **immediately** if they encounter any material that makes them feel uncomfortable.

If there is an incident in which a pupil is exposed to offensive or upsetting material the school will wish to respond to the situation quickly and on a number of levels.

Responsibility for handling incidents involving children will be taken by the ICT Co-ordinator in consultation with the Principal and the pupil's class teacher. All the teaching staff will be made aware of the incident at a Staff Meeting if appropriate.

- If one or more pupils discover (view) inappropriate material our first priority will be to give them appropriate support. The pupil's parents/carers will be informed and given an explanation of the course of action the school has taken. The school aims to work with parents/carers and pupils to resolve any issue;
- If staff or pupils discover unsuitable sites the IT co-ordinator will be informed. The IT co-ordinator will report the URL (address) and content to C2K; if it is thought that the material is illegal, the site will be referred to the police.

Pupils are expected to play their part in reducing the risk of viewing inappropriate material by obeying the **Golden Rules of Responsible Internet Use**, which have been designed to help protect them from exposure to Internet sites carrying offensive material. If pupils abuse the privileges of access to the Internet by failing to follow the rules they have been taught or failing to follow the agreed search plan when given the privilege of undertaking their own Internet search, then sanctions will be applied. This may involve informing the parents/carers. Teachers may also consider whether access to the Internet may be denied for a period.

Using the internet to enhance teaching and learning

Using a web browser & Internet safety

Pupils will be taught to use suitable web search engines. Staff and pupils will begin to use the internet to find and evaluate information. Access to the internet will become a planned part of the curriculum that will enrich and extend learning activities and will be integrated into the class schemes of work.

As in other areas of their work, we recognise that pupils learn most effectively when they are given clear objectives for internet use.

Different ways of accessing information from the internet will be used depending upon the nature of the material being accessed and the age of the pupils:

- access to the internet may be by teacher (or sometimes other-adult) demonstration;
- pupils may access teacher-prepared materials, rather than the open internet;
- pupils may be given a suitable web page or a single web site to access;
- pupils may be provided with lists of relevant and suitable websites/links which they may access;
- older, more experienced, pupils may be allowed to undertake their own internet search having agreed a search plan with their teacher; pupils will be expected to observe the Golden Rules of Responsible Internet Use and will be informed that checks can and will be made on files held on the system and the sites they access.

Pupils accessing the internet will be supervised by an adult, normally their teacher, at all times. They will only be allowed to use the internet once they have been taught the Golden Rules of Responsible Internet Use and the reasons for these rules. Teachers will endeavour to ensure that these rules remain uppermost in the children's minds as they monitor the children using the internet.

Using information from the internet

We believe that, in order to use information from the internet effectively, it is important for pupils to develop an understanding of the nature of the internet and the information

available on it. In particular, they should know that, unlike the school library for example, most of the information on the internet is intended for an adult audience, much of the information on the internet is not properly audited/edited and most of it is copyright protected.

- pupils will be taught to expect a wider range of content, both in level and in audience, than is found in the school library or on TV;
- teachers will ensure that pupils are aware of the need to validate information whenever possible before accepting it as true, and understand that this is even more important when considering information from the internet (as a non-moderated medium);
- when copying materials from the Web, pupils will be taught to observe copyright;
- pupils will be made aware that the writer of an e-mail or the author of a web page may not be the person claimed.

Social networking via our school website, Facebook and G Suite

Social networking is intended to:

- provide accurate, up-to-date information about our school;
- enable pupils to publish work of a high standard, for a very wide audience including pupils, parents, staff, governors, members of the local community and others;
- celebrate good work;
- provide pupils with the opportunity to publish their work on the internet;
- provide pupils with opportunities to collaborate online with their peers and to interact with other pupils and teachers;
- promote the school.

Class teachers will be responsible for ensuring that the content of the pupils' work is accurate and the quality of presentation is maintained. All material must be the author's own work, crediting other work included and stating clearly that author's identity and/or status.

The point of contact on the web site will be the school address, telephone number and e-mail address. We do not publish pupils' full names or photographs that identify individuals on our web pages. Home information or individual e-mail identities will not be published. Permission will be sought from other individuals before they are referred to by name on any pages we publish on our web site.

Inappropriate content

The school website and closed Cairde BBB Facebook group is to be used to promote Bunscoil Bheanna Boirche in a positive manner. It is not to discuss or debate school related issues. Inappropriate content will be deleted, the persons posting may be blocked and the appropriate authorities contacted if necessary.

We in Bunscoil Bheanna Boirche deem the following inappropriate:

- Offensive language or remarks aimed at the school, its staff, parents, governors, children or others affiliated with the school.
- Unsuitable images or content posted to its feed
- Images or text that infringe upon copyright
- Comments that aim to undermine the school, its staff, parents, governors or others affiliated with the school.

Our website is viewed primarily as a means of disseminating information to parents and the community regarding the school. It should not be viewed by parents or members of the public as the primary means of contacting the school. The primary means of contacting the school will be through the school office (02843771356) or through the Info@bunscoilbb.castlewellan.ni.sch.uk

We also have a private school Facebook group run by 'Cairde BBB'. This group will be used to share positive news about the school such as sporting achievements or information or photos of a school trip. Photos taken on a device/phone for the purpose of sharing on Facebook will be immediately deleted from the phone once they photos have been posted online

- Parents are not expected to post pictures of pupils other than their own children on social networking sites.
- Parents should make complaints through official school channels rather than posting them on social networking sites.
- Parents should not post malicious or fictitious comments on social networking sites about any member of the school community.

Internet access and home/school links

Internet use in pupils' homes is rapidly increasing and some parents may be grateful for any advice/guidance that school can offer – especially with regard to safe access for children. The ICT co-ordinator is willing to offer advice and suggest alternative sources of advice on the understanding that neither he/she, the school nor C2k can be held responsible for the consequences of such advice. Further:

- school guidelines on issues such as safe internet use will be made available to parents together with printed information and internet sites providing information for parents about safe access for children;
- the ICT co-ordinator will maintain a stock of relevant leaflets for internet safety.
- the school will participate in the annual 'Safer Internet Day' event with promotes safety online

As it is not possible to be certain of the originator of an e-mail message, the school is unable to accept an e-mail as parental authorisation of a pupil absence or consent to school activities.

Review

Unless any other changes are required, the school eSafety policy will be reviewed in 2023.

Máire Uí Bhuadáin

ICT Co-ordinator

Rules for Responsible Internet Use: Pupils

Teagmháil slán ar an idirlíon - Na Rialacha Órga

1. Bí freagrach agus tú ar-líne.
2. Logáil isteach faoi d'ainm féin i gcónaí agus logáil amach arís nuair nach bhfuil an t-idirlíon in úsáid agat. Ná logáil isteach riamh faoi ainm úsáideora duine eile.
3. Má bhíonn tú i dteagmháil le duine ar líne, ná tabhair d'ainm iomlán, do sheoladh ná d'uimhir ghutháin do dhuine ar bith.
4. Ná bain úsáid as ceamara gréasáin ach amháin le daoine a bhfuil aithne agat orthu.
5. Ná buail le daoine nach bhfuil fíor-aithne agat orthu – is fearr aithne ná aiféala.
6. Ná cuir/scriobh teachtaireachtaí dána, nó rudaí a dhéanfaidh dóchar do dhaoine eile.
7. Níl cead ag páistí ná múinteoirí suíomh mean soisialta ar bith a úsáid ar scoil.
8. Ná glac grianghraf de dhuine ar bith nach bhfuil sásta leis. Ar scoil, ná bain úsáid as ceamara digiteach/iPad ach amháin má tá múinteoir leat.
9. Níl cead ag páistí gutháin pócaí a thabhairt ar scoil ag am ar bith. Mar sin de, níl cead ag páistí ceamara digiteach ar ghutháin a úsáid ar scoil.
10. Má fheiceann tú pictiúr/teachtairacht ar líne a chuireann isteach ort, cuir in iúl don mhúinteoir ranga nó do dhuine fásta láithreach.

Safe Use of the Internet - The Golden Rules

1. Always act responsibly whilst online.
2. Always log on to your computer/device using your own username, and log out/off again when you are not using it. Never log in under someone else's username.
3. Never meet in person someone you have met online
4. Never use a webcam with anyone unless you know them well.
5. If you are communicating with someone online, never give out personal information like your full name, your address or your telephone number.
6. Never send rude or inappropriate messages. Never send a message that is hurtful or offensive.
7. Use of any social media sites in school is strictly prohibited.
8. Don't take photos of someone unless they are happy about it. At school, you are only allowed to use a digital camera/iPad if a teacher is present.
9. Pupils are not allowed to bring mobile phones to school at any time. As a result, taking photos using a mobile phone is not allowed.
10. You must tell a teacher immediately if you encounter any pictures/messages that makes you feel uncomfortable.

Rules for Responsible Internet Use: Staff

The computer system is owned by the school and is made available to pupils to further their education and to staff to enhance their professional activities including teaching, research, administration and management. The school's eSafety Policy has been drawn up to protect all parties - the pupils, the staff and the school. The school reserves the right to examine or delete any files that may be held on its computer system or to monitor any internet sites visited.

1. All pupils are aware of the rules for the safe and effective use of the internet.
2. Access should only be made via the authorised account and password, which should not be made available to any other person;
3. Activity that threatens the integrity of the school ICT systems, or activity that attacks or corrupts other systems, is forbidden;
4. Users are responsible for all e-mails sent and for contacts made that may result in e-mails being received;
5. Posting anonymous messages and forwarding chain letters is forbidden;
6. All internet activity should be appropriate for staff professional activity or pupils' education.
7. The same professional levels of language and content should be applied as for letters or other media, particularly as e-mail is often forwarded or may be sent inadvertently to the wrong person;
8. Use for personal financial gain, gambling, political purposes or advertising is forbidden;
9. Users must access only those sites and materials relevant to their work in school.
10. Users will be aware when they are accessing inappropriate materials and should expect to have their permission to use the system removed;
11. Deliberate/accidental access to inappropriate materials or any other breaches of the school code of practice should be reported immediately to the Principal/ICT Co-ordinator
12. Teachers are aware that the C2K and iPad system tracks all Internet use and records the sites visited. The system also logs emails and messages sent and received by individual users.
13. Teachers should be aware of copyright and intellectual property rights and should be careful not to download or use any materials which are in breach of these.
14. Staff should not give their email address to pupils.
15. Photographs of pupils should, where possible, be taken with a school camera/iPad and images stored on a centralised area on the school network/password protected internet storage, accessible only to teaching staff.

Annex 4

Bunscoil Bheanna Boirche **Arrangements for ICT & eSafety in light of Covid 19**

During the Covid-19 pandemic, there has been an unprecedented and rapid change to the expectations around ICT usage to support remote home learning. As such this addendum covers the acceptable use of these new ways of working and may be integrated into an updated ICT & eSafety Policy in the future.

Children and online safety at home/away from Bunscoil Bheanna Boirche

- Online teaching should follow the same principles as set out in the NI Curriculum. Bunscoil Bheanna Boirche, in partnership with C2K and the EA will ensure any use of online learning tools and systems is in line with privacy and data protection/GDPR requirements.
- If staff are interacting with children away from school online, they must continue to adhere to Bunscoil Bheanna Boirche's Conduct of Staff, Child Protection Policy, ICT and eSafety Policy and any other policies, protocols, professional standards and statutory guidance applicable to their role.
- Staff should use parents' or carers' email addresses or phone numbers from the school's management information system (SIMs) to communicate relevant information about children, unless this poses a safeguarding risk. Use work accounts to communicate via email or online platforms (such as Google Classroom), and **never use personal accounts**. All remote communication with students should be done exclusively via schoolC2K platforms.
- In light of changes in practice due to COVID19, it may be necessary for staff to use their personal mobile phones to communicate with students, parents and carers. Where this is deemed absolutely necessary, this must be agreed with the principal beforehand. Where applicable, staff should make sure any **phone calls from a personal device are made from a withheld number**, so personal contact details are not visible. Keying 141 before the phone number will block your caller ID on the call you're making.

- Staff are able to access or download C2K platforms (such as My School or G Suite) with personal devices at home, but must ensure that **any devices used are securely password protected.**

- If staff members are accessing families' contact details at home, ensure they comply with the Data Protection Act 2018.

Children and young people are likely to spend more time online due to social distancing. Talk to them regularly about the benefits and risks of the online world and give them space to ask questions and talk about anything that worries them.

Delivering Remote Lessons

- Remote 1:1's with students should be avoided, with students being tutored in groups wherever possible. If this is unavoidable, this must be approved by the principal beforehand.

- Staff and children must wear suitable clothing, as should anyone else in the household.

- Any computers used should be in appropriate areas, for example, not in bedrooms; staff need to be mindful that backgrounds do not compromise personal confidentiality

- It is recommended that live lessons should be recorded so that if any issues were to arise, the video can be reviewed.

- Live lessons should be kept to a reasonable length of time, or the streaming may prevent the family 'getting on' with their day.

- Language must be professional and appropriate, including any family members in the background.

- Staff should monitor any class peer to peer conversations taking place on remote learning platforms.

- Staff must only use C2K approved platforms (primarily G Suite – Google Classroom specifically) agreed as a school to communicate with pupils.

- Staff should record the length, time, date and attendance of any sessions held.

- Consider activities carefully when planning – online access within school has internet content filtering systems in place that are unlikely to be replicated in the home environment.

- Be careful that staff and children don't incur surprising costs, eg mobile data access charges (video utilises significant amounts of data).
- Staff should be aware of any children whose photograph is not allowed to be taken and ensure parents consent to their child's image on screen. If the parent does not want the child to appear live they should turn off the camera using tools in the lesson.
- All participants should refrain from taking any screenshots, or otherwise taking pictures or recording the session to safeguard and protect the children taking part.
- Participants should turn off microphones when taking part unless the teacher asks for them to be turned on.
- The chat tool should be used to ask the teacher questions and communicate with each other in an appropriate manner.
- The teacher should set ground rules and protocols at the beginning of each session to address issues of behaviour and feedback. Reminding students of turning off microphones, cameras and being polite, and taking their turn to speak to ensure everyone can be heard. Any follow up work should be completed and submitted in a timely manner.

Reporting Concerns

Communicating online may allow you a view into a young person's world that you would not have seen before (and would maybe not have had the opportunity to without this crisis). This may also generate some safeguarding concerns for that young person. It is important that all staff who interact with children, including online, continue to look out for signs a child may be at risk. Any such concerns should be dealt with as per the Child Protection Policy and where appropriate referrals should still be made to children's social services via Gateway and as required, the police. Any concerns must be recorded and monitored in writing and the Designated Teacher (Máire) or Deputy Designated Teacher (Aingéal) must be informed immediately.

You will also notice if a child is not engaging in learning as required. Where this is the case, this must be reported to the principal so that contact can be made with the child and parent/carer, after an agreed period of time, to ensure they are safe and well. Any continued concerns must be referred to the relevant persons to ensure the safeguarding of the child.

Going Forward

After returning to school full time, it is possible that localised Covid-19 lockdowns may occur, resulting in temporary, short term school closures.

Teachers should be prepared for such eventualities, and be ready to revert back to distance learning for short periods of time, and should therefore engage in blended learning and online homework tasks, encouraging regular logging in to and engaging in Google Classroom activities and tasks from the beginning of term, to ensure all pupils are familiar with and equipped to make the change back to distance learning from home if necessary.
